

Vision, and Hearing

Vision Screening

The vision screening will be administered annually by the school district nurse, trained volunteers, or trained staff to students in grades K-3, 5, and 7, and any other students with a possible loss in visual acuity. The process will include:

1. Scheduling screening.
2. Conducting or supervising the state mandated screening procedures using an acceptable screening device.
3. Keeping records and making recommendations regarding those students whose tests show a possible visual deficit and encourage appropriate follow-up.

Hearing Screening

The hearing screening will be administered annually by the school district nurse, trained volunteers or trained staff to students in grades K-3, 5, and 7, and any other students referred for a possible auditory loss. The school nurse will be responsible for interpretation of results, follow-up, and referral.
